

FAIRSING VINEYARD 2020 ROSÉ of PINOT NOIR

VINTAGE

The 2020 winter season was characterized by mild temperatures and dry conditions. Spring continued to be dry with relatively cool temperatures in April and rain in May.

We observed bloom in mid-May with rains interrupting flowering, resulting in smaller berries and loose grape clusters. Véraison occurred in mid-July.

Temperatures for the growing season (April-October) were the third highest on record. The devastating Labor Day fires were brought on by an extreme wind event and drought with lingering smoke. September and October finished with light rains and average temperatures.

The fruit for our 2020 Rosé of Pinot noir was the first to be harvested on September 12. This combination of Dijon 777 and Pommard selections macerated on the skins for two hours after destemming and was gently pressed before barrel fermentation in neutral French oak.

This wine experienced a total élevage of five months before bottling March 9, 2021.
